THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

Detailed Action

This Action is responsive to the Amendments received on 8/4/2008.

Allowable Subject Matter

1. Claims 1-4, 8, 11, 12, 14-15, 17, 20, 25, and 27-28 are allowed.
2. The following is an examiner's statement of reasons for allowance for claims 1-4, 8, 11, and 27-28:
3. The present invention comprises a signal processing device for processing a received signal to generate a sliced signal from the output of an equalizer in a receiver.
4. The closest prior art Jones (United States Patent No. 6,873,279) shows a similar system which also includes an equalizer for generating an equalized signal according to the received signal; a multilevel quantizer coupled with the equalizer for selectively utilizing a first amount of one or more thresholds or a second amount of one or more thresholds to quantize the equalized signal in order to generate the sliced signal, wherein the first amount is different from the second amount; and a control logic for controlling the multilevel quantizer to quantize the equalized signal by the first amount of threshold/thresholds or the second amount of threshold/thresholds. However, Jones fails to disclose the multilevel quantizer utilizing X threshold/thresholds to quantize the equalized signal to thereby output the sliced signal being one of at least X+1 predetermined levels when a first mode is adopted, and utilizing Y thresholds to quantize the equalized signal to thereby output the sliced signal being one of at least Y+1 predetermined levels when a second mode is adopted, wherein the X and the Y are positive integers, the Y is more than the X, and the at least Y+1 predetermined levels

Art Unit: 2611

are more than the at least $X+1$ predetermined levels; and a control logic for adopting one of the first mode and the second mode by executing the following steps: adopting the first mode and then comparing the equalized signal with the sliced signal which is the one of the at least $X+1$ predetermined levels for obtaining a first difference and comparing the equalized signal with a predetermined value which is different from any of the sliced signal and the X threshold/thresholds for obtaining a second difference; adopting the second mode instead of the first mode when the first difference and the second difference together indicate an unreliable status; and adopting the first mode when the first difference and the second difference together indicate a reliable status. The distinct features have been added to the independent claim 1, therefore rendering claims 1-4, 8, 11, and 27-28 allowable.

5. The following is an examiner's statement of reasons for allowance for claims 12, 14-15, 17, 20, and 25:

6. The closest prior art Jones (United States Patent No. 6,873,279) shows a similar system which also includes an equalizer for generating an equalized signal according to the received signal; a multilevel quantizer coupled with the equalizer for selectively utilizing a first amount of one or more thresholds or a second amount of one or more thresholds to quantize the equalized signal in order to generate the sliced signal, wherein the first amount is different from the second amount; and a control logic for controlling the multilevel quantizer to quantize the equalized signal by the first amount of threshold/thresholds or the second amount of threshold/thresholds. However, Jones fails to disclose the quantizer utilizing X threshold/thresholds to quantize the equalized

Art Unit: 2611

signal to thereby output the sliced signal being one of at least $X+1$ predetermined levels when a first mode is adopted, and utilizing Y thresholds to quantize the equalized signal to thereby output the sliced signal being one of at least $Y+1$ predetermined levels when a second mode is adopted, wherein the X and the Y are positive integers, the Y is more than the X , and the at least $Y+1$ predetermined levels are more than the at least $X+1$ predetermined levels; and a control logic for adopting one of the first mode and the second mode by executing the following steps: adopting the first mode and then comparing the equalized signal with the sliced signal which is the one of the at least $X+1$ predetermined levels for obtaining a first difference and comparing the first difference with a predetermined threshold which is different from any of the sliced signal and the X threshold/thresholds; adopting the second mode instead of the first mode when the first difference is larger than the predetermined threshold; and adopting the first mode when the first difference is smaller than the predetermined threshold. The distinct features have been added to the independent claims 12 and 17, therefore rendering claims 12, 14-15, 17, 20, and 25 allowable.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
